

Anis

Business Intelligence Student — AI & Data Enthusiast

email@example.com | +216 XX XXX XXX | Tunisia | [github.com/anis-demo](#) | [linkedin.com/in/anis-demo](#)

PROFILE

Second-year Business Intelligence student in Tunisia with a strong interest in practical technology and AI. Focused on building hands-on projects rather than theory alone, with a calm, step-by-step approach to learning. Actively growing skills in databases, Python, and web development while targeting long-term career paths in AI engineering, cybersecurity, cloud, or data engineering.

EDUCATION

Business Intelligence — 2nd Year

Tunisia | Final-year project expected next academic year

Coursework: Databases, SQL & Oracle SQL, AI Foundations, Web Programming, Data Mining, Software Engineering, Networking — Power BI planned in an upcoming semester.

Practical Introduction to AI (Python & Google Colab)

Ongoing

PROJECTS

My Student Hub — Personal Academic Website

HTML / CSS | Ongoing personal project

- Built a personal website to organize courses, assignments, key materials, and projects in one place.
- Added a built-in Python file viewer and designed a custom logo and favicon.
- Exploring ideas for automatic file organization to keep content structured as it grows.

School Chatbot

Python → JavaScript (web version)

- Started as a beginner Python project using keyword matching to answer school-related questions.
- Evolved into a web-based chatbot with a JavaScript front end and improved interface.
- Added an online status indicator and fixed duplicate-message handling to refine the user experience.
- Kept the architecture intentionally simple and manageable while iterating on usability.

SKILLS

Databases	SQL, Oracle SQL, Data Mining fundamentals
Programming	Python (Colab/Jupyter), JavaScript, HTML/CSS
AI & Data	AI foundations, hands-on ML basics
Other	Web Programming, Networking basics, Power BI (in progress)

LANGUAGES

Arabic	Native
English	Improving
French	Improving
Spanish	Learning (Latin American accent)
Japanese	Beginner

CAREER FOCUS

Seeking practical, future-resilient technical paths — particularly AI engineering, cybersecurity, cloud, and data engineering — with an emphasis on building a strong project portfolio over theoretical study.
